Assessment & Sale of Used Assets

The spindle can be moved automatically to the height ("X3"), so that the tailstock or counter spindle are central to the main spindle. It is thus possible on the main spindle long workpieces with the tailstock to hold each edit (lower turret in action) and at the same time on the spindle, the back of the workpiece (upper turret in action) bar machining up to Ø65mm possible, the machine will however not come with bar loader
