

Overview and Technical Data:

BRUDERER BSTA 50EL High Speed Press with BBV 205/120

BRUDERER

Year of Build: Jan 1991

Description:

Used BRUDERER BSTA 50EL + BBV 205/120 High Speed Mechanical Press with

LEICHT PTW-130 + BA-120 Reel & Tape Puller

Technical Data Bruder Punching press

Year of construction 1991

Cnc Controls Siedfried Software 12.4

• Pressure force: 500 kN (50Tons) nominal capacity

• Stroke rates: 16; 19; 25; 32; 38; 44; 51 mm

- manually adjustable
- Speed range 100 to 750 SPM max.
- Table: 650 x 920mm
- 950mm clear width
- Ram height adjustment: 60 mm
- Max. Tool width clearance between columns: 770 mm
- Max. Strip clearance width: 203 mm
- Bed opening: 730 x 250 mm.
- Front and rear safety guards with inspection glass
- Feed unit Bruderer BBV 205/120 Double Precision Roll Feed
 - ∘ Feed angle 90°
 - Feed length: 0-120 / 0-150 mm
 - o Roller width: 120/200 mm
 - o Strip width: 203 mm
 - Strip thickness: 6 mm
 - o Weight:ca. 320 kg
 - Belt infeed
 - height from approx. 80 to approx.180mm
- Motor power: 28 kW
- Weight of machine: ca. 8000 kg
- Machine dimensions: H 3040 x W 2710 x D 1820 mm

Installation dimensions and throat hole:

- Installation space: LxW 920 x 650 mm
- Folding hole: LxW 900 x150mm

The dropout hole consists of a hopper for the waste and an integrated flexible tube for good part removal to another belt. The tube can be adjusted from approx. the middle to the end of the dropout hole and has a size of approx. 130 x 130mm.

Special features:

- Vester or Siegfried press control
- Noise protection cabin
- Oil-air heat exchanger on LSK
- Hydraulic quick mold clamping
- Mold monitoring in press control
- Electronic cams
- Control cabinet on pedestal

Engine backlash measurement to evaluate the condition of the mechanical system

- Total clearance (with suspension component): 0.34 mm
- Total clearance (without spring component): 0.268 mm
- According to the statement, the engine is in good condition for its age.

Technical Data - LEICHT PTW-130 reel ± The advantages of the BRUDERER BSTA 50 a gla tape puller BA-120

Every BSTA stamping press contains decades of experience the Year of construction 2011 demands of ambitious customers.

• Control via dancer and loop measurement
Important innovations and solutions which pay attention to the
• Direction of rotation: left and right
more efficiently using our machines
• Voltage: 3x 400V/PE/3x16A

Thanks to the unique lever system of the BSTA stamping press across the system. This load distribution, together with the absolubrication system, is a solution and the high durability and

- Adjustable straken with mass balancing system together we of Tappe widdens with a wide variety of stroke heights
- The apportune transfer of the apportune of t
- Ram adjustment during operation under production cond
 LEPOWEFUBAUTE and brake unit for improved first and las

• Micro-tolerances maintained in the bottom dead center (1

- Probining the interpretation of the unique BRUDERER drive
- Production of the unique BRUDERER dri dumability carros of the keyhole mechanical system
- Integrated measuring and 300mitaring function improved coweight bean anability g
- Easy attachment of peripheral devices for quicker integral

Advantages of Bruderer BBV BBV 205/120 Feeder

These entirely mechanical units have been epitomising precision by the main shaft of the punching press via a cardan shaft angle works with oscillating rollers to generate the feed movement and during the punching process. The feed length can be set steples accurate and continuous transfer of raw punching materials to the punching press's central lubrication system manages lubrication
