CHIRON 15 Series:

The 15 Series Machining Centers are best in class for speed, compact design and reliability. They have huge reserves for highly productive grinding and thanks to their modular design, for example with several spindle and table versions, they can be configured to create the perfect individual solution. Choose them for consistently fast processing and high availability with low unit costs.

Single- and double-spindle machines can be equipped with a chain-type tool changer to process complex workpieces with many tools. Alternatively, the body tool changer is currently the fastest tool change system on the market, ideal for high precision machining of countersunk holes. The FZ/DZ 15 W with load changer for loading and unloading while the machine is running are experts in large quantities, as is the TZ 15 W with four powerful spindles and workpiece changer.

CHIRON 15 Highlights

- Fast, productive machining
- Reliable performance
- Compact machine layout
- Vertical traveling column
- Mineral casting machine bed
- High rigidity and thermal stability
- Dynamic direct drives and precision guides
- High running, positioning, and long-term precision
- Robust CHIRON rotary axes
- Fully enclosed working area, stainless steel covers
- Ideal chip flow directly into the chip feeder
- Ergonomic operating and loading concept
- Easy access to all units for servicing
