Year of Build: Jan 2000

Description:

For sale is a powerful production line for manufacturing wheel discs directly from coil. The heart of the system is a robust 16 MN (approx. 1600 tons) drawing and stamping press from Schirmer + Plate, fed by a modern Schleicher coil line (YOM 2000) designed for heavy coils up to 10 tons and material thickness up to 16 mm. A Kuka 6-axis robot automates parts handling, ensuring an efficient production flow.

This complete line is the ideal solution for the serial production of truck or car wheel discs and other stamped or formed parts that require high pressing force and material thickness.

Buy a used wheel disc production line. Complete system with a 16 MN Schirmer + Plate press, Schleicher coil line (up to 16mm), and a Kuka robot.

Highlights of the Line

- **High Pressing Force:** A massive **Schirmer + Plate** drawing and stamping press with 16 MN (approx. 1,600 t).
- **Heavy-Duty Coil Line:** **Schleicher** decoiler and straightener (YOM 2000) for strip widths up to 650 mm and thickness up to 16 mm.
- **Automated Handling:** A **Kuka KR150-2 2000** industrial robot (YOM 2005) is integrated into the process.
- **Complete Solution:** A full line from decoiling to the output station, including conveyors and workshop equipment.
